<ul style="list-style-type: none">Overlooked the technological design and development of all projects conducted.Responsible for code design and efficiency.Provided mentorship to members of the club with less experience.Collaborated with companies and leaders of other clubs to expand the organization's network.	

Personal Projects

CollaboGreat - Team Collaboration

Full-Stack Web Application

- Developed an internal REST API with NodeJS and Express used to handle client requests and perform CRUD operations on a MongoDB Database.
- Implemented user authentication using the OAuth protocol, which allows users to authenticate with their existing Facebook, Google, or Github accounts.
- Created a front-end Single-Page Application with React, Redux and Material UI.
- Hosted the API on Digital Ocean with NGINX web server.
